

57.0 PARCEL NUMBER 1316006

Owner: MSA Ltd.
Land Use: Vacant/unknown

57.1 PARCEL DESCRIPTION

Parcel number 1316006 is approximately 1.82 +/- acres in size. The DOE identified a nominal width of approximately 31 meters, or about 100 feet, as the preferred width for a construction right-of-way, where practicable in areas with private land. Therefore, this is most likely the absolute minimum width of the construction right-of-way. This parcel will be impacted even using this very conservative estimate of the construction right-of-way.

57.2 PROPOSED RAILROAD ALIGNMENT – DOE PROPOSED ROUTE – CALIENTE ALTERNATIVE

The Caliente alternative segment would begin in Caliente, enter Meadow Valley at Indian Cove, and extend generally north through Meadow Valley and along U.S. Highway 93.

57.2.1 Impacts for Proposed Alignment

57.2.1.1 Taking of Private Property

Lincoln County is a vast county with minimal private land.

Planning/policy development

No impacts from the initial planning and policy development phase were identified.

Detailed planning/funding/impact assessment

Construction of the Caliente Railroad will require the acquisition of right-of-way over private land. It is anticipated that this acquisition will commence during the detailed planning phase. This acquisition will likely impact this parcel. The DOE identified the general construction right-of-way for the Caliente Railroad as having a nominal width of 300 meters, or about 1,000 feet. While they state they will try to limit that where there is private property, there are no commitments, let alone guarantees. Therefore, it is possible that all of the properties within this boundary will be impacted during the construction and operation of the Caliente Railroad.

Construction/implementation

The magnitude of the Caliente Railroad construction project lends itself to unexpected, unplanned changes to the implementation plan as the project progresses. Thus, even if all of the land acquisition that is anticipated is accomplished in the previous phase, it is highly

Robison/Seidler, Inc.

likely that additional acquisitions may be required as the project progresses. The existing portion of this parcel outside of the construction right-of-way may be seriously disturbed during the construction of the Caliente Railroad.

Operation/maintenance

It is not anticipated that additional impacts to private property will occur during this phase that were not already identified during previous phases unless the scope of the shipping campaign substantially increases and requires expansion of staging yards or other such facilities.

Abandonment/decommissioning

More detailed information is needed from the U.S. Department of Energy regarding future possible plans for abandonment or decommissioning of the railroad before impacts can be properly assessed.

57.2.1.2 Effects on Property Values and Other Economic Impacts

Planning/policy development

No impacts from the initial planning and policy development phase were identified.

Detailed planning/funding/impact assessment

As right-of-ways are acquired, the existing land will be irreversibly impacted. It is not likely that the acquisition of right-of-ways will result in significant adverse impacts to this parcel.

Construction/implementation

It is not likely that the construction of the Caliente Railroad will result in significant adverse economic impacts to this parcel unless the width of the right-of-way will interfere with the existing use of the property.

Operation/maintenance

It is not likely that the operation of the Caliente Railroad will result in significant adverse economic impacts to this parcel unless the width of the right-of-way will interfere with the existing use of the property.

Abandonment/decommissioning

More detailed information is needed from the U.S. Department of Energy regarding future possible plans for abandonment or decommissioning of the railroad before impacts can be properly assessed. However, if the DOE plans on abandoning or decommissioning the railroad, nationwide experience with the abandonment of railroads and federal projects show that significant impacts often occur.

57.2.2 Mitigation/Compensation for Proposed Alignment

57.2.2.1 Avoiding

Avoiding the impacts to this property is not possible if this rail alignment is selected.

57.2.2.2 Minimizing

Minimizing the impacts to this property is possible through the reduction of the width of right-of-way needed on this parcel. It is recommended that the right-of-way for construction and operation not exceed the 31-meter nominal width identified by the DOE as the preferred width in areas of private land. It is further recommended that the DOE make commitments, in writing, to the property owners regarding the maximum right-of-way that will be needed across this parcel.

57.2.2.3 Rectifying

Rectifying the impacts to this property is not possible if this rail alignment is selected.

57.2.2.4 Reducing

Reducing the impacts to this property is not possible if this rail alignment is selected.

Robison/Seidler, Inc.

57.2.2.5 Compensating

No acceptable mitigation measures were identified. Therefore, compensating the property owner for the taking of this property is recommended.

57.3 PROPOSED RAILROAD ALIGNMENT – LINCOLN COUNTY SHORT ROUTE – CALIENTE ALTERNATIVE

The Caliente alternative segment would begin in Caliente, enter Meadow Valley at Indian Cove, and extend generally north through Meadow Valley and along U.S. Highway 93.

57.3.1 Impacts for Proposed Alignment

57.3.1.1 Taking of Private Property

Lincoln County is a vast county with minimal private land.

Planning/policy development

No impacts from the initial planning and policy development phase were identified.

Detailed planning/funding/impact assessment

Construction of the Caliente Railroad will require the acquisition of right-of-way over private land. It is anticipated that this acquisition will commence during the detailed planning phase. This acquisition will likely impact this parcel. The DOE identified the general construction right-of-way for the Caliente Railroad as having a nominal width of 300 meters, or about 1,000 feet. While they state they will try to limit that where there is private property, there are no commitments, let alone guarantees. Therefore, it is possible that all of the properties within this boundary will be impacted during the construction and operation of the Caliente Railroad.

Construction/implementation

The magnitude of the Caliente Railroad construction project lends itself to unexpected, unplanned changes to the implementation plan as the project progresses.
